

Product Information**Product description**

Operational Sector :	Mipa Polish removes slight scratches, sanding traces, spray dust and dirt from the paint surface and increases the gloss of the paint.
Features :	Mipa Polish is free from silicon and therefore ideally suited for professional end users.
Storage :	At least 3 years, if stored in tightly closed original containers, protected against frost.

Application

Processing method:	Best with a well impregnated lambs wool or foam disc with machine application at 2000 r.p.m.
Application :	Polish as long with machine until damaged points in the paint surface have disappeared. The optimal gloss afterwards is reached by polishing manually.
Special remarks :	Do not allow to set hard during application. Do not get pressure on the polishing machine. Shake well tin before application and close it well after use.

Disposal

The packing has to be clean, dry and absolutely free from any rests of material. Remove the metal from the plastic packings. Packings have to show the label of the latest filling.

All products should be disposed of in relation to the regulations of the environmental health authorities. Protect your environment.
