

Mipa 2K-HS-Express-Filler FX 6

Quick to Apply – Strong in Results

Mipa 2K-HS-Express-Filler FX 6 is a high-quality, universally applicable 2K filler for fast and efficient repair coating (express technology) that does not require oven drying.

- Very fast curing at room temperature (20 °C)
- Oven drying optional: sandable after approx. 10 minutes at 60 °C
- Universal adhesion to metal without pre-treatment cloths
- Can also be used as a wet-on-wet filler – recoatable after 15 minutes
- Very good adhesion to steel, iron, aluminium and zinc substrates
