

Pro Mix® Eisenglimmer Design

Effective and precise with maximum durability

Design surfaces with maximum appearance and the highest quality: The Pro Mix® Eisenglimmer Design colour chart comprises 16 effect colours with an elegant, matt character, based on DB iron mica colours. The resulting colours create the typical iron mica look on smooth surfaces. The addition of Pro Mix® Structure Additives PP60 creates an additional tactile 3D effect.

- Applicable for steel furniture, façade elements and other product designs
- Suitable for selected Pro Mix® colour bases
- Other custom colours available on request
