

MCS ColorMatch Magnetschablone

Always finding the right colour

With the new Mipa MCS ColorMatch Magnetschablone, you can quickly decide whether your chosen colour matches the vehicle to be painted. The template allows you to easily attach the colour card and spray-out and remove them again without leaving any residue. The painter can flexibly fix the magnetic board to the vehicle and compare the shades with the original color of the car. With this efficient system, the vehicle can also be viewed from different perspectives without making manual fixation necessary. The MCS ColorMatch Magnetschablone makes comprehensive color matching possible and guides you quickly and reliably to the right colour.
